

## **Not All Makeovers Have to Be Extreme!**

By Dr. Allan J. Milewski, D.D.S.

Did you ever wish that you could makeover your smile? Well, not all makeovers have to be extreme! Recent advances in dental technology can make having the smile of your dreams a reality!

**Porcelain veneers** are a great choice for people with uneven, chipped teeth. They can even be used to close gaps between teeth. Veneers are extremely thin layers of porcelain that are custom made to enhance the size, shape, color or even length of your teeth. The veneer is bonded to the surface of your tooth and looks completely natural! Veneers can be a wonderful choice for dramatically improving the appearance of your front teeth!

**Implants** are a great solution for replacing a tooth that is missing. A small anchor is placed into the jawbone of the place where your natural tooth was once located. Then a dental restoration is placed over the anchor. The result is a natural looking tooth that is much like a real tooth only a dentist can tell the difference!

**White Fillings:** While the American Dental Association still recommends silver (or amalgam) fillings as a safe, affordable and durable material for dental restorations, many patients choose the more cosmetically pleasing white, or composite fillings. Composite fillings take longer to place and are more expensive than silver fillings, but many patients consider it well worthwhile when they see how closely the composite color can be made to match their teeth!

**Whitening:** Perhaps one of the most simple and most dramatic changes you can make with your smile is whitening. Whitening products abound, but we believe our whitening system gets great results and is very cost effective. A custom whitening tray is made to fit exactly to your teeth. Our patients simply wear these trays for an hour twice a day with our gentle whitening solution and the result is a sparkling smile that is sure to get everyone's attention!

Remember, not all makeovers have to be extreme! Contact **Dr. Milewski** today and see how easily you can have the smile of your dreams!
