

Sparkling Smiles are just a Visit Away!

By Allan J. Milewski, DDS

Like it or not, your appearance matters! How you present yourself can affect you in your personal and professional life. Is it time for you to brighten up your smile? Here's the good news....a sparkling smile can be yours with minimal cost, time and effort! And the results can be dazzling!

Tooth Whitening Products abound in today's market. Drug store bleaching strips, expensive procedures involving lights, even booths at the mall all have their promoters. However, what my patients use and have had great success with is a simple at home whitening procedure. It is easy, affordable, and the results are WOW!

Here is how it works. Impressions are taken of your teeth. We use this impression to fabricate a custom tray using a special vacuum technique. This custom tray is clear, lightweight and extremely comfortable to wear. We make the tray to fit exactly to your upper and lower teeth, which maximizes the effectiveness of the whitening gel and minimizes sensitivity.

Once your tray is made, we will give you our special whitening gel and teach you how to use the product with your custom whitening trays. Our patients typically wear their whitening trays for just thirty minutes to one hour a day for about two weeks. The result? Sparkling white teeth that make you proud to smile!

Once your teeth are whitened, they are easily maintained with whitening toothpaste and the occasional reapplication of the whitening gel. It's that easy!

Whitening your teeth is easier and more affordable than ever! Don't wait! Call us today! Your Sparkling Smile is just a visit away!
